GENUINE PEACE OF MIND

COMPUTER NETWORK LEGEND*

- High-Speed Controller Area Network (CAN)
- Medium-Speed Controller Area Network (CAN)

Transmission Control Module (TCM)
Controls shift timing, line pressure and the torque converter clutch.

Instrument Cluster
Provides driver with system status and alerts driver of certain vehicle conditions.

Audio Control Unit
Sends audio signals to the speakers or amplifiers.

Smart Junction Box (SJB)
Responsible for many of the key signals and comfort functions on the vehicle such as: warning chimes, illuminated entry, exterior back lamps, backlighting, horn, interior lamps, power door locks, smart locks, remote keyless entry (RKE) keypad, RKE system, front windshield wiper and heated rear window.

Driver Door Module (DDM)
Stores the driver's seat and mirror positions for recall.

Driver Seat Module
Controls the position of the power driver seat and the power outside rearview mirrors.

Occupant Clarification Sensor
Provides status of the front passenger seat occupant to the RCM.

Climate-Controlled Seat Module
Controls the heating and cooling elements in the driver and passenger seat.

Restraints Control Module (RCM)
Controls the deployment of the airbags.

Climate Control Assembly
Controls the automatic climate functions that maintain the vehicle's interior temperature.

Antilock Brake System (ABS) Module
Controls brake pressure to all four wheels.

Powertrain Control Module (PCM)
Controls the engine for optimum fuel economy and minimum emissions. Manages onboard emissions monitoring, transmission control information and passive anti-theft functions.

* Images displayed represent a typical communication network and should only be used as an example. PremiumCARE and ExtraCARE plans cover many electrical and high-tech components.

See dealer for exact component coverage and plan details.

With Ford ESP You Don't Have To Be Frazzled By The Small Print
